# APPLICATIONS

Apparel And Accessories

Agriculture

Health/Hygiene/Medical

Furniture And Furnishing

Bag

Packaging

Mattress

Filtration

Nonwovens are extensively used in the medical field and biological agents in other sectors. With today's multi-drug resistant strains of bacteria and virus Nonwoven can help in the fight against cross-contamination and the spread of infection in medical or surgical environments.

**Surgical:** single-use caps, gowns, face masks, scrub suits, shoe covers, head covers. Drapes, wraps and packs. Sponges, dressings and wipes. Bed linen. Contamination control gowns. Examination gowns. Lab coats. Tissue scaffolding.

# AGRICULTURAL

**GLOBAL**  
TECHNITEX HYGIENIC PRODUCT

UV Treated Nonwoven Fabric is a worldwide known in Agriculture Field. Our Fabric has specialized UV stabilizers/Absorbers agents in it which ensure protection against extreme sun rays & extreme weather conditions. This fabric basically creates a microclimate providing uniform ventilation there by encoding early growth and development of the crop plant and tree etc. with valuable end result of both improvement in quality. UV Treated Nonwoven Agri fabric is a modern textile which is neither a film or a conventional textile. It is very light, generally 17 to 19 grams per square meter and therefore very economical. Our UV Treated fabric protects the plant from cold and frost up to 5 degree °C some circulating moisture is trapped by it and in the event of frost, this fabric freezes providing the plant with natural frost protection. It minimizes the dangers caused by hail storms, heavy rains and locust attack on crops.
